Space &  
Defense

**35%**

Note: The total may not be 100% owing to the exclusion of "Other" and "Adjustments"

Since 1853, IHI has pioneered Japan's heavy industry. We started out by accumulating shipbuilding technology that we applied to industrial machinery, plant manufacturing and construction. Now we are a key provider of massive elements of industrial and social infrastructure. Our products underscore our management philosophy of contributing to the development of society through technology.

The IHI Group seeks to solve the various environmental, industrial, social, and energy-related problems of the 21st century, through using engineering expertise to focus on "Monozukuri" technology. In striving towards these goals, IHI is becoming a global enterprise offering the safety and security for the benefit of both the environment and humanity. "Monozukuri" Technology means the technology used to improve the competitiveness of products and services offered, by strengthening the capabilities required in development, design, supply, manufacture and construction.
